Aged Care Services

Therapy Focus

We believe every person's journey should be extraordinary.

Our comprehensive assessment and support services help people aged 65 and over maintain their independence and do the things they love later in life.

Services are tailored to the unique needs of every individual and can be provided in the comfort of your own home, in care facilities, or from our offices across Perth and the South West.
We offer therapy services in regional areas based on community demand. Contact us to discuss how we can best support your individual needs.

Occupational Therapy

Live life to the fullest with support to ensure you can complete daily tasks and do the things that are important to you.

Falls Prevention

A tailored approach to preventing falls, including equipment prescription, exercises and lifestyle and environmental strategies.

Dementia Management

Support for you and your loved ones to navigate the changes associated with dementia. Including recommendations for environmental adaptations, communication and strategies to maintain independence.

Physiotherapy

Maintain your movement, strength and mobility and maximise your functional wellbeing. Services include the provision of exercise plans and prescription of equipment if needed.

Assistive Technology

Prescription of assistive technology, aids and equipment that can maintain and improve your independence and safety. Including **personal alarms** - to alert family members and emergency services when you are in need of assistance.

Home Modifications

Advice, support and prescription of modifications and aids to improve the safety, accessibility and comfort of your home. Including **ramps** for easier access to your home and garden and **rails** in the toilet, shower or bathroom.

Speech Pathology

Access support if you have difficulty talking, communicating or swallowing, including the provision of meal time management plans.

Dietetics

Support to maintain health, independence and quality of life. Assess nutritional status and identify and support with treatment of malnutrition, unintentional weight loss, frailty, diabetes and loss of muscle mass.
